Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I: Claims 1-11 read on Figs. 1-9B (applicant's first embodiment);

Group II: Claims 12-22 read on Figs. 12-19 (applicant's Third embodiment).

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I discloses a control unit for discriminating specifications for processing of the printer, selecting one of the plurality of circuit arrangement information in accordance with the discriminated specifications for processing, and setting a circuit logic for the scanner based on the selected circuit arrangement;

In contrast, Group II discloses a control unit for discriminating specifications for processing of the scanner, selecting one of the plurality of circuit arrangement information in accordance with the discriminated specifications for processing, and setting a circuit logic for the printer based on the selected circuit arrangement.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing

of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Contact Information

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas Q. Tran whose telephone number is (703) 305-4857 or e-mail address is Douglas.tran@uspto.gov.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-4700.
